DETAILED ACTION

Election/Restrictions

The reply filed on 20031028 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): An election of species has not been made. Please note that Applicant elected Invention II rather than electing species A (claims 1-7) or species B (claims 11-31) of Invention II. See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment.

EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Invention I. Claims 8-10, drawn to a method (process) of pressure-sealing a ferroelectric liquid crystal display, classified in class 349, subclass 190.

Invention II. Claims 1-7 and 11-31, drawn to a pressure sealing apparatus, classified in class 65, subclass 152+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be

practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case (1) the process as claimed may be performed manually, without the apparatus as claimed, e.g., heating may be performed with means other than heat coils.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Invention II contains claims directed to the following patentably distinct species of the claimed invention:

Species A, claims 1-7, drawn to a pressure sealing apparatus comprising: one heat coil provided at a pressurized surface (not at the interior of an upper plate).

Species B, claims 11-31, drawn to a pressure sealing apparatus comprising: two heat coils wherein one heat coil is at the interior of an upper plate.

Applicant is required under 35 U.S.C. 121 to elect Invention I or a single disclosed species, A or B, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are considered generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
